

TABLE OF CONTENTS

chapter		page
1	Introduction: Evo-Devo, butterfly wings and <i>Bicyclus anynana</i> eyespots	1
2	Developmental constraints versus flexibility in morphological evolution	21
3	Butterfly eyespots and the evolution of individuality	33
4	Developmental integration in modular butterfly wing patterns	49
5	Male attractiveness and eyespot size in <i>Bicyclus anynana</i> butterflies	69
6	Contribution of <i>Distal-less</i> to quantitative variation in butterfly eyespots	81
7	Mechanisms of eyespot size specification: preliminary results and some future perspectives	95
8	Overview: this thesis and some ideas for future research	119
	Samenvatting/Sumário	127
	Publications	132
	<i>Curriculum Vitae</i>	133
	Acknowledgements	135
